THERMOSTATIC STEAM TRAPS

Nicholson is the originator of the bellows actuated Thermostatic Steam Trap. Nicholson’s thermostatic product range spans applications from critical tracing to high capacity process. High sensitivity, immediate air venting and exceptional thermal efficiency are the hallmark of Nicholson Thermostatic Steam Traps.
N125 SERIES
THERMOSTATIC STEAM TRAPS

Pressures to 125 PSIG (8.75 barg)
Temperatures to 400°F (204°C)

Superior Performance - Hardened valve and seats are lapped in matched sets, providing tight shutoff and long service life.

Improved Energy Savings - Maximum elimination of air and non-condensibles - trap is closed at saturated steam temperature.

Temperature Sensitive Actuators - One moving part. Stainless Steel, fail open or fail closed, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

Freeze Proof - Threaded male union horizontal inlet and vertical outlet-self draining.

In-line Maintenance - Threaded cover for one step removal, inspection and service without breaking pipe connections.

Air Vent - Efficient steam service air vent when equipped with ISO Bellows and installed in air vent location.

Guaranteed - Guaranteed against defects in materials or workmanship for 3 years.

MODELS*

- N125 - Standard capacity
- N125L - Low capacity
- N125HC - High capacity
- N125ST-FC - Standard capacity w/sterilizer seat
- N125STHC-FC - High capacity w/sterilizer seat

*Add (-FC) for fail closed or (-FO) for fail open to end of model number

Options

- ST - Sterilizer Trim (1/4 & 5/16 orifice sizes)
- SLR - SLR Orifice
- S - Internal Stainless Strainer
- ISO - ISO Filled Actuator
- HC - High Capacity

Applications

- Steam Tracing
- Drip Legs
- Automatic Air Vents
- Sterilizers
- Cooking Kettles
- Water Heaters
- Laundry Equipment
- Radiators
- Process Equipment
- Air Handlers

Canadian Registration # 0E0591.9

Operation

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in N125L (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads.
N125 SERIES
THERMOSTATIC STEAM TRAPS

SPECIFICATION
Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required, SLR orifice and Sterilizer trim will be available to allow condensate evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of three orifice sizes shall be available allowing for custom capacity sizing. Trap shall be bronze bodied suitable for pressures through 125 psig and available in 3/8” through 3/4” NPT connections.

Maximum operating conditions
PMO: Max. Operating Pressure 125 psig (8.75 barg)
TMO: Max. Operating Temperature 400°F (204°C)
PMA: Max. Allowable Pressure 125 psig (8.75 barg)
TMA: Max. Allowable Temperature 400°F (204°F)

Materials of construction
Body & Cover ...........ASTM B283 C37700
Actuator...............Welded Stainless Steel
Cover Gasket..........Copper Jacketed
Valve & Seat.........Hardened 416 Stainless Steel

Nicholson recommends ISO filled Actuator for superheated steam.
N450 SERIES
THERMOSTATIC STEAM TRAPS

Pressures to 450 PSIG (31 barg)
Temperatures to 600°F (316°C)

Compact - Easy to Install.
Inexpensive - Low initial cost.
Improved Energy Savings - High efficiency-maximum elimination of air and non-condensibles.
Temperature Sensitive Actuators - One moving part. Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.
Hardened Stainless Steel Valve and Seat - Long life. Lapped as a matched set for water tight seal.
Easily Maintained - Can be inspected and serviced without breaking pipe connections.
Freeze Proof - Self draining when installed vertically.
For Superheated Steam Applications - Because the trap closes at saturated steam temperature, superheated steam cannot reach trap.
Air Vent - Efficient steam service air vent when equipped with ISO filled Actuator and installed in air vent location.
Guaranteed - Guaranteed against defects in materials or workmanship for 3 years.

MODELS*
- N451-FO - Low capacity, fail open only
- N452 - Reduced capacity
- N453 - Standard capacity
- N454 - High capacity
*Add (-FC) for fail closed or (-FO) for fail open to end of model number

Options
- SK - Skirted Seat*
- SLR - SLR Orifice
- ISO - ISO Filled Actuator*
- ST - Sterilizer Trim
- SW - Socketweld
*Not available on N451

Applications
- Unit Heaters
- Air Vents
- Steam Tracing
- Drip Legs
- Platen Presses
- Plating Tanks
- Sterilizers
- Tire Presses
- Cooking Equipment
- Laundry Equipment
- Other Process Equipment

Canadian Registration # 0E0591.9

Operation
Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in the N451 seat (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads such as are encountered on tracer lines.
**SPECIFICATION**

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required, SLR orifice and Sterilizer trim will be available to allow condensate evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of three orifice sizes shall be available allowing for custom capacity sizing. Trap shall be forged carbon steel bodied suitable for pressures through 450 psig and available in 1/2" and 3/4" NPT or socket weld.

*Maximum operating conditions*

PMO: Max. Operating Pressure 450 psig (31 barg)
TMO: Max. Operating Temperature 600°F (316°C)

PMA: Max. Allowable Pressure 450 psig (31 barg)
TMA: Max. Allowable Temperature 750°F (399°F)

† Consult factory for pressures greater than 300 psi.

LIQUIDATOR 450 SERIES
THERMOSTATIC STEAM TRAP

Pressures To 450 PSIG
Temperatures to 600°F

Applications
- Unit Heaters
- Laundry Equipment
- Steam Tracing
- Plating Tanks
- Drip Legs
- Platen Presses
- Tire Presses
- Cooking Equipment
- Air Vents

Easily Maintained
Four bolt cover permits easy in-line rebuilding for less than the cost of replacement.

Excellent Energy Savings
Positive shutoff and thermostatic action assure no loss of steam during normal operation.

Fits all Universal Connectors
Liquidator body will replace any manufacturers’ universal mount trap body.

Easily Replaced
Two bolt design permits rapid removal without breaking pipe connections.

Freeze Proof
Self draining when installed vertically.

Optional Integral Strainer
Helps prevent dirt and scale build-up on valve seat.

Durability and Long Service Life
Stainless steel body and cover with stainless steel welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

Rapid Startup with Outstanding Air Handling
Thermostatic action responds quickly to eliminate air and other non-condensibles. Large startup capacity.

Water Tight Seal
Hardened stainless steel valve and seat lapped as a matched set assure tight seal and long life.

3 Year Guarantee
Guaranteed against defects in material and workmanship.
LIQUIDATOR 450 SERIES
UNIVERSAL MOUNT
THERMOSTATIC STEAM TRAPS

SPECIFICATION

Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required, SLR orifice and Sterilizer trim will be available to allow condensate evacuation at or near saturated temperatures. Where sub cooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of two orifice sizes shall be available allowing for custom capacity sizing. Trap shall be stainless steel bodied suitable for pressures through 450 psig. Trap connection shall be two bolt universal swivel mount. Mounting block shall be stainless steel and available in 1⁄2" through 1" NPT or socket weld.

ISO filled Actuator recommended for superheated steam.
LIQUIDATOR 450 SERIES
UNIVERSAL MOUNT
THERMOSTATIC STEAM TRAPS

Pressures to 450 PSIG (31 barg)
Temperatures to 600°F (316°C)

Easily Maintained - Universal two bolt swivel mounting simplifies removal from system. Kits allow flexibility to replace or rebuild.

Simple Installation - Stainless mounting block mounts permanently into system. Trap installs via two bolt universal connection.

Improved Energy Savings - High efficiency-maximum elimination of air and non-condensibles.

Temperature Sensitive Actuators - One moving part. Stainless Steel, fail open, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

Hardened Stainless Steel Valve and Seat - Long life. Lapped as a matched set for water tight seal.

Easily Maintained - Can be inspected and serviced without breaking pipe connections.

Freeze Proof - Self draining when installed vertically.

For Superheated Steam Applications - Because the trap closes at saturated steam temperature, superheated steam cannot reach trap.

Air Vent - Efficient steam service air vent when equipped with ISO filled Actuator and installed in air vent location.

Guaranteed - Traps are guaranteed against defects in materials or workmanship for three years.

Positive Shutoff and Long Life - Integral Stainless Steel Strainer helps prevent debris depositing on valve and seat.

Applications
- Unit Heaters
- Steam Tracing
- Drip Legs
- Tire Presses
- Cooking Equipment
- Laundry Equipment
- Plating Tanks
- Platen Presses
- Air Vents

Options
- SLR - SLR Orifice*
- ISO - ISO Filled Actuator*  
- SW - Socketweld
- B - Blowdown Valve
* Not available on UMT451T

MODELS
- UMT451–Very Low Capacity Trap
- UMT452–Low Capacity Trap

SEE PAGE 116

Operation
Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Restricted orifice in UMT451T (small opening at bottom of valve seat) prevents trap from discharging continuously on light loads such as are encountered on tracer lines.
TA SERIES
THERMOSTATIC STEAM TRAPS

Pressures To 650 PSIG (44.8 barg)
Temperatures to 750°F (400°C)

Sealed Stainless Steel Body - Lightweight, compact and corrosion resistant. No bolts or gaskets. Eliminates body leaks.

Self Centering Valve - Leak tight shutoff. Improved energy savings. Assembly of actuator and valve to impingement plate allows valve to self-align with center of valve seat orifice. Provides long lasting valve and seat.

Temperature Sensitive Actuators - One moving part. Stainless Steel, fail open or fail closed, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

For Superheated Steam Applications - Because the trap closes at saturated steam temperature, superheated steam cannot reach trap.

Thermal and Hydraulic Shock Resistant - Impingement plate plus welded construction prevent damage to actuator.

Hardened Stainless Steel Valve and Seat - Long life. Lapped as a matched set for water tight seal.

Inexpensive - Low initial cost.

Maintenance Free - Sealed unit. Replacement traps cost less than repair of more expensive in-line repairable traps.

Freeze Proof - Self draining when installed vertically.

Directional Discharge - Pipe thread erosion prevented by directing discharge to center of pipe.

Air Vent - Efficient steam service air vent when equipped with ISO Bellows and installed in air vent location.

Guaranteed - Guaranteed against defects in materials or workmanship for 3 years.

N650 SERIES
THERMOSTATIC STEAM TRAPS

Pressures To 650 PSIG (44.8 barg)
Temperatures to 750°F (400°C)

Positive Shutoff - Valve and seats are lapped in matched sets, providing tight shutoff for light and no load conditions which results in improved energy savings.

Freeze Proof - Self draining when installed vertically.

Compact–Easy to Install - Ample extension for pipe wrench provided.

Easily Maintained - Actuator element and valve are attached to cover to facilitate inspection and servicing. Optional stainless blowdown valve permits easy strainer cleaning while in service.

Directional Discharge - Pipe and thread erosion prevented by directing condensate to center of discharge pipe.

Hardened Stainless Steel Valve and Seat - Long life. Lapped as a matched set for water tight seal.

Temperature Sensitive Actuators - One moving part. Stainless Steel, fail open or fail closed, welded actuator for maximum corrosion, thermal and hydraulic shock resistance.

Positive Shutoff and Long Life - Integral Stainless Steel Strainer helps prevent debris from depositing onto valve and seat.

Strainer - Integral Stainless Steel Strainer standard on all models.

Guaranteed - Guanteed against defects in materials or workmanship for 3 years.

MODELS

- **N651-FO** - Y pattern body w/strainer and blowdown port tapped & plugged; low capacity, fail open
- **N652** - Reduced capacity
- **N653** - Standard capacity
- **N654** - High capacity

*Add (-FC) for fail closed or (-FO) for fail open to end of model number

Applications

- Unit Heaters
- Air Vents
- Steam Tracing
- Drip Legs
- Plating Tanks
- Sterilizers
- Tire Presses
- Cooking Equipment
- Laundry Equipment
- Other Process Equipment

Options

- **B** - Blowdown Valve
- **ISO** - ISO Filled Actuator*
- **SK** - Skirted Seat*
- **SLR** - SLR Orifice
- **SW** - Socketweld

*Not available on N651

Canadian Registration # 0E0591.9

Operation

Thermal actuator is filled at its free length with a liquid having a lower boiling point than water. On start-up, valve is normally open. When steam enters trap, thermal actuator fill vaporizes to a pressure higher than line pressure. This forces valve into seat orifice to prevent any further flow. As condensate collects, it takes heat from thermal actuator, lowering internal pressure. Line pressure will then compress thermal actuator to open valve and discharge condensate. Valve opening automatically adjusts to load conditions from minimum on very light loads to full lift at maximum load. Optional blowdown valve allows fast and easy cleaning of internal strainer without removing trap from operation.
N650 SERIES
THERMOSTATIC STEAM TRAPS

SPECIFICATION
Steam trap shall be of balanced pressure design with stainless steel welded actuator capable of discharging condensate within 10°F of saturated temperature. Where greater sensitivity is required or protection from flash steam locking, a SLR orifice will be available to allow condensate and flash steam evacuation at or near saturated temperatures. Where subcooling of condensate is desired alternate thermostatic actuator will be available to allow condensate evacuation at or near 40°F below saturated temperatures. Thermostatic actuator shall employ a conical valve lapped in matched sets with the seat ring assuring tight shut off. A minimum of four orifice sizes shall be available allowing for custom capacity sizing. Trap shall be forged carbon steel Y pattern body with strainer and available blow down valve suitable for pressures to 650 psig and available in 1/2” and 3/4” NPT or socketweld.

Maximum operating conditions

Standard Traps
PMO: Max. Operating Pressure 500 psig (34.5 barg)
TMO: Max. Operating Temperature 600°F (316°C)

ISO Option Traps
PMO: Max. Operating Pressure 650 psig (44.8 barg)
TMO: Max. Operating Temperature 650°F (343°C)

All Traps
PMA: Max. Allowable Pressure 650 psig (44.8 barg)
TMA: Max. Allowable Temperature 750°F (400°C)

Connections: 1/2” or 3/4” NPT or socketweld

Materials of construction

Body & Cover .......... ASTM A105 Forged Steel
Actuator ................ Welded Stainless Steel
Cover Gasket .......... 304 SS Spiral Wound w/Graphite Fill
Strainer ................ .033 Perf. 304 Stainless Steel
Blowdown Valve ...... 416 Stainless Steel
Valve & Seat .......... Hardened 416 Stainless Steel
